

## Ed Tech Tools for Interactive Presentations

### Nearpod

Teacher logs into Nearpod.com and creates multimedia presentation with interactive features in the cloud.

In the classroom the teacher runs the presentation from their iPad. Students see the content on their iPads and submit responses.

Download the Nearpod iPad app and sign up for the free account. Do the tutorial – you can use another computer to see what a student sees.

How to create a presentation. (you can do this from any computer on the web)

Sign into Nearpod.

Click Create.

Click New Presentation

Upload a PDF, image or .zip (convert ppt to PDF first)

Click the + icon to add interactive features (poll, quiz, drawing, video, website)

Drag the interactive slide to where you want it in the sequence.

To publish your presentation click Done at the bottom right, select your presentation and click Publish.

To show your presentation in class.

Launch your NearPod Teacher app on your iPad and log in.

Select your presentation from the library and click Launch.

Have students launch the Nearpod Student app and enter the PIN or go to

<http://nearpod.com> click Join Session at the top and enter the PIN

The PIN shows up at the top right of the teacher app. (5 letters).

After the first slide it will ask students to enter their name.

Back at nearpod.com you can get a pdf report of each session.
