

Downloading a video from YouTube so you can play it on your computer.

*Part One*

HAMLET IS BACK .ARNOLD SCHWARZENEGGER .TRAILER . AMDSFILMS

Go to YouTube and find the video you want.

Copy the URL for the video.

Open a website that contains a YouTube Video Download Tool.

Try <http://www.techcrunch.com/get-youtube-movie/> or <http://www.youtubecatcher.com>

Paste the URL into the box and click Get Video or Download.

You need to rename the video to have .flv as the extension. You can either do this as you're downloading, or after it's downloaded (it's called Get Video by default).

*Part Two*

Download something that will play .flv files.

Try downloading and installing VLC player

<http://www.videolan.org/vlc/>

You may need to right click on the .flv file and pull down to Open with to select VLC player. Consider checking the Always play... box at the bottom.
