

Simplified Guide to using i>clicker 6.1 with Moodle

Overview:

1. Create a course and tell i>clicker you are using Moodle as your CMS (only once for setup)
2. Load the course roster from Moodle into your i>clicker course and sync it (only once for setup)
3. Export session data from i>grader and import into Moodle gradebook (repeat as necessary)

Create a course:

Launch i>clicker.

Click New. Enter Course Name, Course Number and Section Number. Click Create.

Select the newly created course and click My Settings.

In the CMS/Registration tab select Moodle and Set for Course.

Close i>clicker.

Export your Moodle course roster:

Log into your Moodle course. Go to Grades. Select Export > Plain Text.

Settings:

Decimal points: 0

Separator: Tab

Grade Items to be included: uncheck all items

Download to your desktop (or somewhere you can find it)

*Rename the file to MoodleRoster.txt (*important step*)

Move the file into your i>clicker folder as follows:

Iclicker Win/Classes/*name of course*/MoodleRoster.txt

Synchronizing Registrations:

Launch i>grader.

Click the Sync button at the bottom right. This matches the student's clicker to their Moodle username.

Uploading grades from i>grader to Moodle (part 1):

Launch i>grader. Make sure it says Output formatted for Moodle at the bottom right.

Click the Export icon at the top (looks like an upward arrow).

Select the session you want to export. Click Next.

This will create a file called MoodleUpload.xls

Uploading grades from i>grader to Moodle (part 2):

Log into your Moodle course and under Grades click Import.

Select CSV file and upload the MoodleUpload.xls file which you can find in the IClicker Win/Classes/*name of course*/ folder.

For Separator select Tab.

Map from: ID number

Map to: useremail

Grade item mappings: ignore all except the session (6/12/13) which you want as a new gradeitem

Click Upload grades.
