

Ed Tech Tools for Online Media Production

Mozilla PopcornMaker

Go to <https://popcorn.webmaker.org/>

Paste a link to a youtube or vimeo video at the right and click Create Clip

Drag the clip to the window.

Change the in and out points to match your clip duration

Click the Events tab at the right and add things to the video clip.

Text, Popups, Googlemap, images, Wikipedia entries

Use the timeline at the bottom to determine where in the video your events will occur.

You can create multiple layers.

You can do some simple editing.

Sign up for a free account to save your project.

Looks like you get a Mozilla webmaker account.

When you save you'll get a URL for your project that you can share or embed.

(*still in early beta – expect changes)
