

## Streaming a wmv file

1. create a wmv file (named filename.wmv in this example)
2. Open Notepad and enter the following:

```
<html>
<body>
<p>
<object id="MediaPlayer"
classid="clsid:6BF52A52-394A-11D3-B153-00C04F79FAA6"
type="application/x-oleobject"
standby="Loading Microsoft Windows Media Player Components..."
height="360" width="480">
<param name="enabled" value="true" />
<param name="url" value="filename.wmv" />
<param name="autostart" value="true" />
<param name="uimode" value="full" />
</object>
</p>
</body>
</html>
```

Save as filename.html

3. upload filename.wmv and filename.html to your website (or WebCT)
4. Create a link to filename.html
