Sale finalized for home built by students

The third home constructed through Rutland Senior Secondary's residential construction program has been sold.

Eleven students were involved in most aspects of the construction, from placing the forms for the foundation to framing and installing windows.

The students worked under the guidance of instructors Bob Boback and Steve Reimer and general contractor Harmony Homes.

The 1,750 square foot, three-bedroom, two-bath home at 203 Poonian Rd. in Kelowna was completed in September 2009.

The sale of home at \$450,000 was recently finalized with approval from the B.C. Ministry of Education.

"The dual-credit residential construction program offered through Rutland Senior Secondary School is part of an extensive array of special

courses and programs offered by School District 23," said Rolli Cacchioni, chairperson of the Central Okanagan school board.

"This type of program allows students to specialize in areas of personal interest and gain skills that lead them to jobs in our local economy.

"We value our partnership with Okanagan College in this venture and the tremendous support the program receives from its sponsors."

"As a partner in this project we take great pride in the success of this program, the achievements of the students and the strong community support for this initiative," said Jim Hamilton, president of Okanagan College.

"There is no better learning opportunity for students than the hands-on training provided through the residential construc-

tion program.”

“This project offered some unique learning and challenges that our students and instructors were able to meet,” said RSS principal Curtis Schreiber.

“I would like to ac-

knowledge all the companies, businesses and individuals who have made contributions to the project—the success of this project is because of these relationships.

“Most importantly, we would like to thank Harmony Homes. With

their building experience and professional background, we were able to be part of a venture that produced a beautiful quality home leaving a strong legacy of student learning and achievement.”

The fourth home in the residential construc-

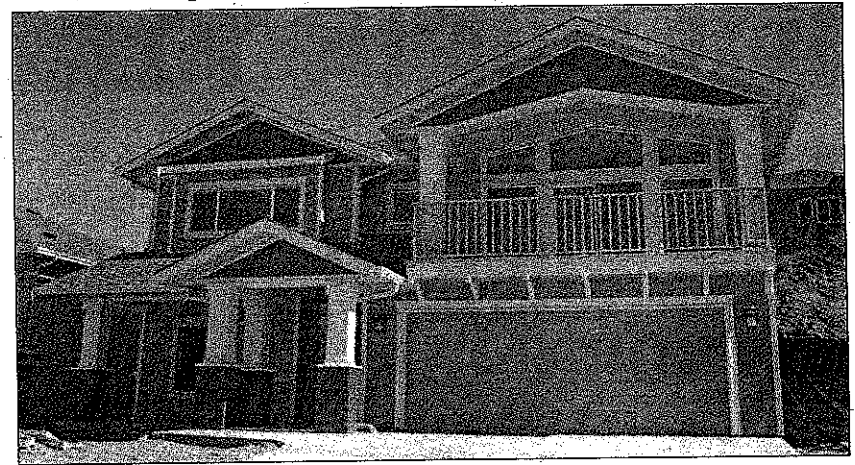

tion project will be built in the Tower Ranch subdivision in conjunction with Dilworth Quality Homes Inc.

The residential construction program is a joint undertaking by School District 23 and Okanagan College.

This career training program allows students to complete their Grade 12 diploma as they gain marketable skills and level one technical credit towards their apprenticeship. Students take regular high school courses from September to January and then begin the construction project.

Students receive instruction from January to March with Bob Boback, an RSS teacher and Red Seal accredited carpenter with extensive construction experience.

place from March to July.

Once the project is complete, students have the opportunity to attain the last three levels of technical certification at Okanagan College.

This college training is supported by School District 23 through scholarships and bursaries.
