

Unprecedented! We've Never Died Like This

The purpose of this educational event is to introduce the “Essentials in Hospice Palliative Care” resources. Explore how these tools can be integrated in core curriculum and across the continuum of care to improve the capacity of professional and non professional caregivers to provide excellent care for those at end of life.

We will explore the changes in how we as a species are dying, contemplate the effect of changing demographics and the aging of the Baby Boomers, and identify “Who cares” for the dying?

Katherine Murray BSN, MA, CHPCN (C)

Kath has focused her professional career on care of the dying and enhancing end of life care through excellent education for both professional and non-professional caregivers. In 2004 she received Certification as a Hospice Palliative Care Nurse (Canada), and in 2005 graduated with a Masters degree in Thanatology (study of death, dying and bereavement) and became a Certified Thanatologist. She is renowned for her ability to synthesize medical/nursing terminology into easy-to-understand language and convey it with warmth and humour.
