

SCMT TINY HOUSE

Okanagan College
Penticton Campus

2015-2016

Advancing innovation in sustainable construction technologies and practices in the tiny house movement.

SCMT has started the construction of a 167 sq.ft. (off-grid) Tiny House on a 7'by20' dual-axle trailer. The exterior of the house was recently completed by SCMT students and we are currently completing the interior of the house. Upon completion, the tiny house will serve as a demonstration and living laboratory for sustainable state-of-the-art technologies and will be monitored for energy performance as well as indoor environmental quality.

If you are interested in collaborating with SCMT on this or future Tiny Homes or would like a tour, please contact the Chair of SCMT, Dr. Amy Vaillancourt, at 250.492.4305 ext. 3321 or by email at availlancourt@okanagan.bc.ca.
