

Designing an Online Course

Ten Core Principles

Dr. Beverlie Dietze Chantale Hutchinson

LEARNING & APPLIED RESEARCH and EDUCATION TECHNOLOGY

connecting for learning and innovation

Isn't the preparation the same as delivering face-to-face?

How will students participate?

I am not confident with technology.
Some of my students may not have appropriate resources or lack confidence using technology.

How can I do this when I don't believe online is as powerful a medium for learning as students being in the classroom with me?

How can I ensure students are learning in this format?

Learning Outcomes

- At the conclusion of this session, participants will be able to:
 - Discuss common questions and fears of transitioning to on-line course delivery.
 - Identify ten core practices used when designing courses for on-line delivery.
 - Outline next steps in framing a course for on-line delivery

LEARNING & APPLIED RESEARCH

Comparing Course Development

- Course Development for Face-to-Face
 - Key strategies

- Course Development for on-line
 - Key strategies

What are the similarities? What are the differences?

LEARNING & APPLIED RESEARCH and EDUCATION TECHNOLOGY

connecting for learning and innovation

Things to think about

What core content will be delivered on Collaborate? Why?

What do you want students to know or be able to do at the end of course?

What are your core learning outcomes?

What is my teaching philosophy? How important is student engagement?

What do you want the students to say about the course at the end of it? What aspects of the curriculum could be delivered via Moodle?
How and why?

What features of Moodle have I used?

What aspects of the course may be self-directed by students?

How might students contribute to the delivery of core content?

How might students engage in peer learning? Why is this important? How is student success measured? Why?

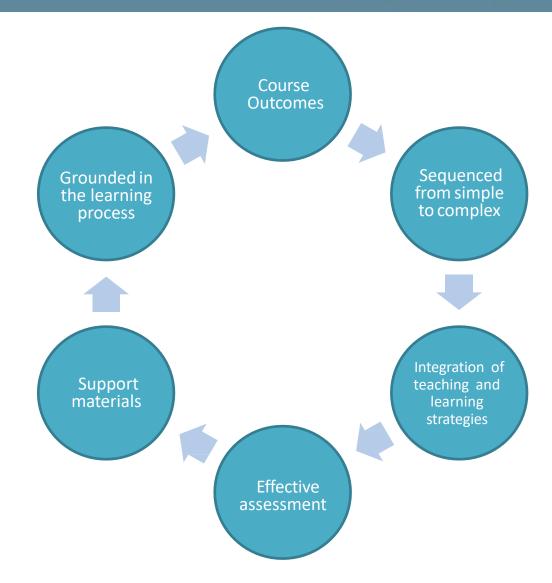

LEARNING & APPLIED RESEARCH and EDUCATION TECHNOLOGY

connecting for learning and innovation

Principle 1

Design course in a thoughtful and methodical way.

Principle 2

Map the course out beginning with the end of the course to the beginning.

Use a planning sequence with fourstages:

- Identify desired results
- Determine themes
- Identify learning outcomes
- Plan learning experiences and instruction

the Backward
Design
Process...

Principle 3

Collaborate sessions are designed to be consistent in

presentation

Introduce topic

- Welcome
- Outline topic
- •Engage in a pre-assessment
- Identify learning outcomes
- Discuss importance to discipline

Presentation

- Present information using a variety of teaching and learning strategies
- Pose questions for students to react to on the chat box from content or readings

Student Engagement

- Group discussions in group breakout rooms
- Presentations
- •Interactive brainstorms and engagement with instructional materials
- Polls
- Other

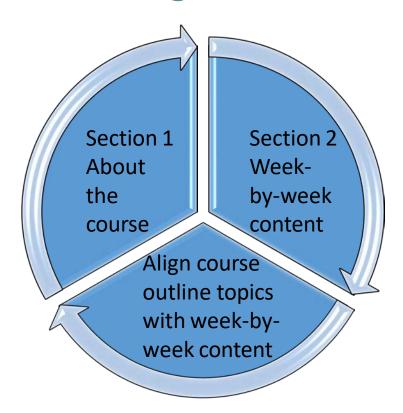

Principle 4

Course Moodle Shells are designed to be clear and concise.

- Course outline
- Assignments and submission process
- Expectations
- Instructor / Faculty introduction
- Office hours
- Announcements

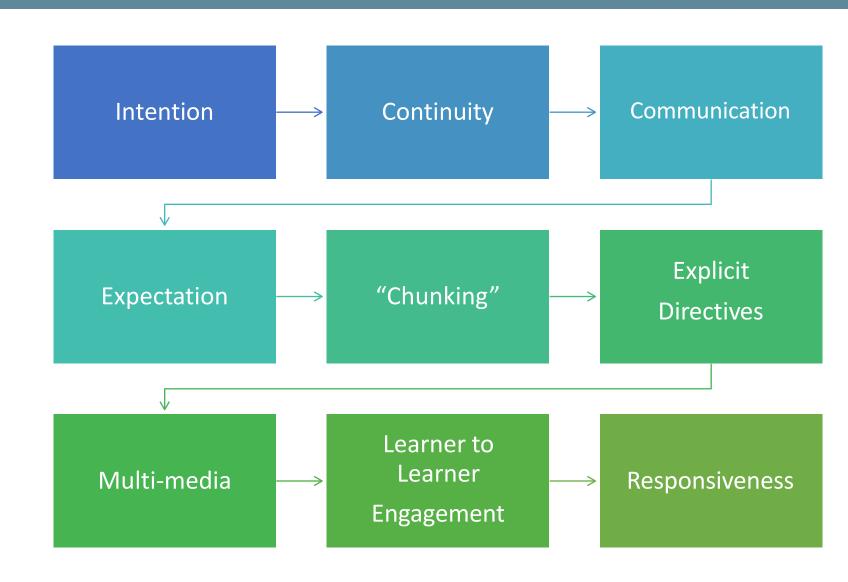

- Learning outcomes
- Link for Collaborate
- PowerPoints
- Readings for class
- Videos for class
- Discussion Forums
- Activities
- Assessment/reflection
- Other resources

^{*} There is a new section for each week, with the layout the same

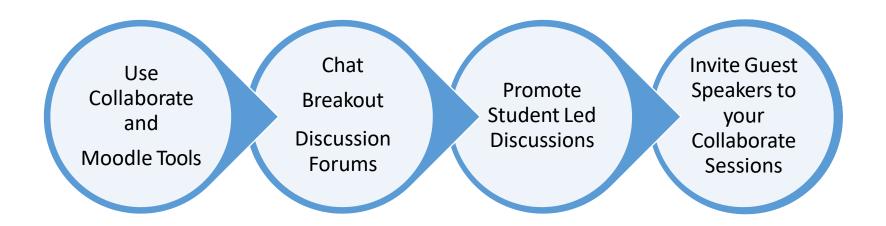

Moodle Course Design

Principle 5

Integrate student engagement and experiential learning into the course.

Principle 6

Ensure the course is accessible to all learners:

 Use Universal Design for Learning Strategies Alternative ways for students to identify what they have learned

Use technology effectively and proactively

Multiple ways for students to acquire the information

Principle 7

• Use a variety of media with purpose.

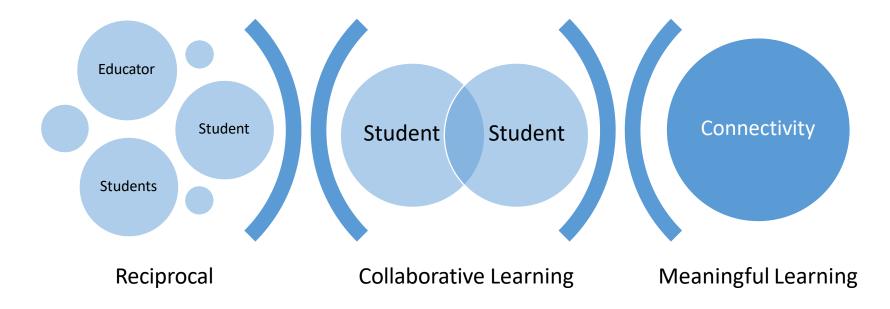

Principle 8

 Identify multiple communication strategies between learners and educator.

Principle 9

Choose assessment strategies that align with the learning outcomes and support learners in sharing learning.

Focuses on achievement of significant outcomes Application of Outcome Experiential learning in Based authentic contexts Curriculum Assessments are aligned with learning outcomes

Principle 10

 Establish how you will illustrate high quality teaching and learning strategies.

Be present

Create strategies for rapid feedback

Design + Delivery = Learning

Summary

- At the conclusion of this session, participants will be able to:
 - Discuss common questions and fears of transitioning to on-line course delivery.
 - Identify ten core practices used when designing courses for on-line delivery.
 - Outline next steps in framing a course for on-line delivery
